Location: Mansoura, Egypt

Professional Summary

Computer Science Undergraduate specializing in Data Science and Machine Learning. Proven expertise in building predictive models and analyzing complex datasets using Python, SQL, and Scikit-learn. Committed to delivering data-driven insights and deploying statistical models in a challenging Data Scientist role.

Education

Bachelor of Computer Science | Mansoura University, Egypt

Expected Graduation: 2027

Projects

1. Person Classifier – [https://github.com/wagehii/Person_Classifier]

- Developed a robust classification model to identify individuals based on biometric features, achieving an accuracy of **92%** on the validation set.
- Conducted data preprocessing and feature scaling to optimize model performance and reduce training time by **15%**.
- Achieved **90% Precision** and **88% Recall**, ensuring high reliability for positive class predictions.
- Reduced dataset noise by **20%** through advanced preprocessing, resulting in a **95% validation accuracy**.

2. Home Prices Prediction – [<https://github.com/wagehii/HomePrices>]

- Engineered a linear regression model to predict real estate prices, utilizing a dataset of **1000+** records.
- Improved prediction accuracy by **12%** by removing **50+ outliers** identified during comprehensive EDA.
- Identified 3 key price drivers by visualizing **50+** feature correlations using Seaborn heatmaps.

3. Disease Prediction App – [https://github.com/wagehii/Desease_Prediction]

- Deployed an end-to-end ML web app capable of processing **100+ real-time requests** for disease prediction.

- Reduced user input time by **40%** by designing an intuitive Streamlit interface for non-technical users.
- Processed over **5,000+ records** of raw medical data into a structured format for model training.

Skills

- **Programming & Scripting:** Python (Advanced), SQL, Assembly.
- **Data Science Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.
- **Tools & Platforms:** Jupyter Notebooks, Git & GitHub, Excel, Streamlit.
- **Concepts:** Supervised/Unsupervised Learning, Regression, Classification, Data Cleaning, EDA.
- **Languages:** Arabic (Native), English (B1).

Experience

Data Science Team Leader & Trainee | Digital Egypt Pioneers Initiative (DEPI)
(Nov 2025 – Jul 2026)

- Selected as a Team Leader for a group of **32** data science trainees, coordinating project tasks and ensuring timely delivery of milestones.
- Completed an intensive training program focused on Data Science fundamentals, Machine Learning algorithms, and data analysis using Python.
- Led the development of a capstone project **Enterprise Healthcare Risk Prediction Platform with Feature Store & MLOps**, overseeing the end-to-end process from data cleaning to model deployment.
- Facilitated communication between team members and mentors, fostering a collaborative agile environment.

Data Science Committee Member | CAT Reloaded (Computer Assistance Team)
(Aug 2024 – Present)

- Engaged in **15+ technical workshops**, mastering Python libraries like Pandas and Scikit-learn for data analysis.
- Collaborated with a team of **4 peers** to engineer machine learning models for **2 internal hackathons**.
- Co-organized **3 major technical events**, delivering content on Data Science trends to over **250+ students**.
